3,749 useable

Majority of respondents were between the ages of 20-64 years old

29.7% of respondents identified with a race that was not white

38.6% of respondents' current profession was "health care"

The 2019 State Health Assessment's (SHA) Community Health Issues Survey (CHIS) was conducted by the University of Alabama at Tuscaloosa. Participants were asked to choose and rank the top ten health issues for their community. Following the survey, a weighted calculation was utilized to determine the final score for the topic. The final scores were provided to the Alabama Department of Public Health and aggregated final scores and totals were calculated for the subgroupings according to the following options:
